Repair:

Repair: Case 2394 S/N# 9941769 HRS: 6452
Started unit, warmed up. Flow tested each remote and only one has hydraulics. Check load sense pressure and system pressure. Removed remote stack and found load sense plugs are missing seals. Reinstalled all pieces. Retested hydraulics, #2 and #3 still do not have hydraulics. Removed valve stack again and found #2 load check spool was missing. Installed a machine plug, held with a set screw. Reinstalled in tractor and flow tested. Each hydraulic had 2250 PSI. DEAN'S MACHINE INC 8559 - MAKE UP PLUG AND INSTALL IN HYDRAULICS PORT AS PER REQUESTED. FARMTRONICS 8561 - Inspected - test - replace - 1MR751 Semi
